Integrating Front end Components with Web Applications Maksim Surguy

Learn how to implement Bootstrap, tagging, autosuggest, spinners, date pickers, AJAX file uploaders and more in web applications.

Are you good at building all things back end but not so good with front end? "Integrating Frontend Components with Web Applications" is a book for web developers that strive for good design and usability in their applications. You will save time with libraries, techniques and plugins taught in the book.

Over the past few years of building web applications I have gathered a list of tools and frameworks that assist in building frontend components that improve the usability and the visual appeal of web applications. This book will guide you through installation, usage and customization of these front end libraries, frameworks and components.

Such common problems as integrating Bootstrap, Tagging, Notifications, Spinners, AJAX login and registration, AJAX contact forms, AJAX file uploads & Avatar Cropping, Date Pickers and more are discussed in the book. Besides integration of frontend components optimization is also discussed.

Chapter by chapter, you will be introduced to various concepts of using front end libraries to make your applications look better and be more useful for the end user.

When you reach the last page of the book you will be able to integrate over a dozen of front end components and frameworks in your applications and make your users happy.

From reader reviews:

Samuel Salamanca:

Reading a book can be one of a lot of activity that everyone in the world likes. Do you like reading book and so. There are a lot of reasons why people enjoy it. First reading a book will give you a lot of new details. When you read a reserve you will get new information mainly because book is one of several ways to share the information or perhaps their idea. Second, reading through a book will make you actually more imaginative. When you reading through a book especially fiction book the author will bring you to definitely imagine the story how the character types do it anything. Third, you may share your knowledge to other people. When you read this Integrating Front end Components with Web Applications, you are able to tells your family, friends and also soon about yours guide. Your knowledge can inspire others, make them reading a publication.

Daniel Miller:

A lot of people always spent their very own free time to vacation or even go to the outside with them family members or their friend. Do you realize? Many a lot of people spent they free time just watching TV, as well as playing video games all day long. If you would like try to find a new activity here is look different you can read the book. It is really fun for you personally. If you enjoy the book that you just read you can spent the whole day to reading a publication. The book Integrating Front end Components with Web Applications it is extremely good to read. There are a lot of people that recommended this book. These were enjoying reading this book. In case you did not have enough space to create this book you can buy often the e-book. You can m0ore simply to read this book through your smart phone. The price is not to cover but this book provides high quality.

Sarah Frigo:

This Integrating Front end Components with Web Applications is great book for you because the content that is certainly full of information for you who have always deal with world and get to make decision every minute. This kind of book reveal it data accurately using great organize word or we can state no rambling sentences within it. So if you are read it hurriedly you can have whole information in it. Doesn't mean it only gives you straight forward sentences but tricky core information with wonderful delivering sentences. Having Integrating Front end Components with Web Applications in your hand like keeping the world in your arm, data in it is not ridiculous a single. We can say that no book that offer you world inside ten or fifteen tiny right but this reserve already do that. So , this really is good reading book. Hello Mr. and Mrs. occupied do you still doubt this?

John Hill:

Reading a book for being new life style in this season; every people loves to go through a book. When you learn a book you can get a large amount of benefit. When you read books, you can improve your knowledge,

simply because book has a lot of information onto it. The information that you will get depend on what kinds of book that you have read. In order to get information about your analysis, you can read education books, but if you act like you want to entertain yourself read a fiction books, this kind of us novel, comics, and also soon. The Integrating Front end Components with Web Applications will give you a new experience in examining a book.
