4th revised and expanded edition of the author's re-discovery of the scientific/technical basis for a space-propulsion system invented in the late 19th century by Nikola Tesla, now used in the secret flying machines known as "UFOs" or "flying saucers". Documentation follows the development of Tesla's theory which the author had to assemble like pieces of a jigsaw puzzle. False propaganda is covertly maintained under national security laws. The technology has been concealed for over 70 years. A "paranormalist" network blurs the facts of reality and disjoins inquiry, protecting archaic technology and resources of coercive-monopolist, corporate-state interests by default. Chapter VI is the Lyne Atomic Hydrogen Furnace with updates. This is a 1964 invention of the author which is the most exciting free energy discovery in the world.
