Legacies and Change in Polar Sciences: Historical, Legal and Political Reflections on The International Polar Year (Global Interdisciplinary Studies Series) Monica Tennberg

Providing case study analyses of the politics of science in and around the International Polar Year of 2007â€“2008, this volume makes a distinct contribution to ongoing research focusing on the relationship between science, international politics, law and history. The contributors combine both interdisciplinary and multi-theoretical approaches to engage directly with the most recent debates in international relations scholarship, to include discussions of arctic climate change, governance issues, reflections on the Antarctic Treaty and the scienceâ€™geopolitics interface amongst others. This is the first comprehensive account to look explicitly at the relationship between global politics and science through an account of the International Polar Years.
