NASA Open Government Plan United States Government National Aeronautics and Space Administration

Whether NASA is using social networks to allow students to interact directly with astronauts or creating a Cloud Computing Platform to give unprecedented access to scientific data, NASA has embraced Open Government. Our founding legislation in 1958 instructed NASA to "...provide for the widest practicable and appropriate dissemination of information..." The principles of Open Government have been embedded in NASA operations for 50 plus years. This plan is our start in revisiting these concepts and creating a new level of openness and accountability in our policies, technology, and overall culture. The plan will evolve over time as we continue to see success in these areas and work to replicate it throughout the Agency. The NASA Open Government Plan is divided into two main sections: the "Framework and Leadership" section and 25 fact sheets. The "Framework and Leadership" section describes NASA's history of openness and outlines our framework for approaching Open Government. This framework is based on: a perspective of continuous learning; integration of policy, technology, and culture; and the rapidly changing external environment. We believe that integrating Open Government Principles into existing systems (e.g., governance councils and performance management system) provides the best framework for success. Through this plan we establish a solid foundation for institutional change based on the five NASA Open Government principles: 1. Increase Agency transparency and accountability to external stakeholders. 2. Enable citizen participation in NASA's mission. 3. Improve internal NASA collaboration and innovation. 4. Encourage partnerships that can create economic opportunity. 5. Institutionalize Open Government philosophies and practices at NASA. The 25 fact sheets in this plan highlight specific activities at NASA that meet and, in many cases, exceed the requirements Open Government Directive. Three "Flagship" initiatives describe NASA's most recent efforts and commitment that take Open Government to a new level. Each "Flagship" initiative focuses on one of the interconnected tenets of Open Government: • Policy: NASA is working to make open source software development more collaborative at NASA to benefit both the Agency and the public. • Technology: NASA Nebula, the U.S. government's only cloud computing platform, offers an easier way for NASA scientists and researchers to share large, complex data sets with external partners and the public. • Culture: The creation of a new NASA Participatory Exploration Office will infuse more public participation into NASA's mission. In addition to the "Flagship" fact sheets, this plan highlights four other new initiatives that demonstrate how NASA is more open and participatory, such as NASA's contributions to Data.gov and Open Innovation Pilots. More than half of fact sheets outline ongoing initiatives at NASA that have been in place for some time and our efforts to make them even more open and collaborative. Some fact sheets describe ongoing activities unique to NASA that showcase our history of giving the public open access to our missions such as NASA TV and opportunities for public participation and collaboration such as Education Activities and Centennial Challenges, NASA's prize program. Other fact sheets describe areas that apply to all Agencies, such as FOIA, Congressional outreach, declassification, and records management. All of the initiatives, both new and ongoing, described in this plan outline how these areas will make improvements in the Open Government principles in the short and long term. The fact sheets all follow the same structure to enable easier browsing and comprehension. Each one is written by the respective initiative, project, or program giving them the opportunity to communicate what they do, how it fits into Open Government, their goals for the next two years, useful links, and two anecdotes that embody Open Government.

From reader reviews:

Dennis Boone:

Do you have favorite book? For those who have, what is your favorite's book? Guide is very important thing for us to find out everything in the world. Each reserve has different aim or perhaps goal; it means that guide has different type. Some people really feel enjoy to spend their the perfect time to read a book. They are really reading whatever they consider because their hobby is reading a book. Consider the person who don't like reading a book? Sometime, person feel need book after they found difficult problem as well as exercise. Well, probably you'll have this NASA Open Government Plan.

William Bellard:

This NASA Open Government Plan are usually reliable for you who want to be described as a successful person, why. The explanation of this NASA Open Government Plan can be one of several great books you must have will be giving you more than just simple examining food but feed you actually with information that perhaps will shock your previous knowledge. This book is usually handy, you can bring it just about everywhere and whenever your conditions at e-book and printed people. Beside that this NASA Open Government Plan forcing you to have an enormous of experience such as rich vocabulary, giving you trial run of critical thinking that we know it useful in your day activity. So , let's have it and revel in reading.

Frances Drury:

Do you have something that you like such as book? The book lovers usually prefer to choose book like comic, small story and the biggest one is novel. Now, why not hoping NASA Open Government Plan that give your fun preference will be satisfied by reading this book. Reading habit all over the world can be said as the opportunity for people to know world much better then how they react when it comes to the world. It can't be mentioned constantly that reading routine only for the geeky individual but for all of you who wants to always be success person. So , for every you who want to start studying as your good habit, it is possible to pick NASA Open Government Plan become your current starter.

Sylvia Alexander:

Book is one of source of understanding. We can add our know-how from it. Not only for students but native or citizen require book to know the change information of year for you to year. As we know those books have many advantages. Beside we all add our knowledge, can also bring us to around the world. By book NASA Open Government Plan we can take more advantage. Don't you to definitely be creative people? To become creative person must prefer to read a book. Merely choose the best book that ideal with your aim. Don't end up being doubt to change your life by this book NASA Open Government Plan. You can more pleasing than now.
