Are you worried about the risks associated with the stock market? Are you tired of seeing your returns diminish month after month, quarter after quarter?

Are you looking to potentially increase your trading profits AND reduce your risk level? How do you do this? With ETFs.

The First Quantified Book on Trading ETFs

TradingMarkets is excited to announce the launch of High Probability ETF Trading. Written by Larry Connors and Cesar Alvarez, this book is designed to give you the trading edge you need for success. The strategies have been tested back as far as 1993, all of which have performed with a high accuracy, some up to 90%. While there are many ways to trade ETFs, applying these strategies can increase your trading success.

3 Reasons Why You Should Be Trading ETFs

1. ETFs Are Safer Than Stocks - There is less single stock corporate risk as ETFs are a basket of underlying securities. With multiple securities, you aren't subject to the wide array of risk including corporate scandals, after market earning reports, and other factors that affect individual stocks.

2. Trade ETFs On Both The Long And Short Side - This enables the opportunity to profit in both rising and declining markets.

3. Trade ETFs With or Without Leverage - Many traders like the idea of getting added leverage in their trading and the newly released leveraged ETFs have seen tremendous volume growth as active traders have gravitated to them.

What You Will Learn From Reading High Probability ETF Trading.

In this book, you will learn 7 ETF strategies that have been tested on a universe of 20 of the more liquid ETFs including the SPYs and QQQs. Each strategy was tested since the inception of the trading of each ETF.

How Well Have the Strategies Performed?

The strategies you will learn resulted in over 80% winning trades since October 2008 in the Larry Connors' Daily Battle Plan.

In fact, from October 2008, these strategies have resulted in following results in the model portfolio:

- 102 ETF Set-Ups
- 82 Winning Trades
- 80% Correct

How Do the Strategies Work?

You will identify the signals at the close of the day. Then, you simply place your orders and exit when the signal occurs, usually 3 to 7 trading days later. That's it!

Are the Strategies Difficult to Learn?

No! In fact all have only a few rules and all the strategies can be learned in an evening. You'll be able to apply the strategies to the next trading day.

Do You Have Strategies for Shorting ETFs?

Yes. Every strategy is designed to be traded both on the long side (especially for bull markets) and the short side (especially for bear markets).

From reader reviews:

Barbara Stewart:

Do you have favorite book? When you have, what is your favorite's book? Publication is very important thing for us to learn everything in the world. Each book has different aim or perhaps goal; it means that book has different type. Some people really feel enjoy to spend their the perfect time to read a book. They are really reading whatever they get because their hobby is reading a book. Think about the person who don't like reading a book? Sometime, man feel need book after they found difficult problem or exercise. Well, probably you'll have this High Probability ETF Trading: Professional Strategies to Improve Your ETF Trading (Softcover).

Laquita Horton:

Nowadays reading books become more and more than want or need but also get a life style. This reading practice give you lot of advantages. The huge benefits you got of course the knowledge the particular information inside the book that improve your knowledge and information. The information you get based on what kind of book you read, if you want drive more knowledge just go with education books but if you want feel happy read one with theme for entertaining for example comic or novel. The actual High Probability ETF Trading: Professional Strategies to Improve Your ETF Trading (Softcover) is kind of book which is giving the reader unpredictable experience.

Robert Thomas:

Spent a free time and energy to be fun activity to complete! A lot of people spent their leisure time with their family, or their own friends. Usually they accomplishing activity like watching television, likely to beach, or picnic inside the park. They actually doing ditto every week. Do you feel it? Will you something different to fill your free time/ holiday? May be reading a book may be option to fill your no cost time/ holiday. The first thing that you will ask may be what kinds of guide that you should read. If you want to test look for book, may be the book untitled High Probability ETF Trading: Professional Strategies to Improve Your ETF Trading (Softcover) can be very good book to read. May be it could be best activity to you.

John Stewart:

The reason? Because this High Probability ETF Trading: Professional Strategies to Improve Your ETF Trading (Softcover) is an unordinary book that the inside of the book waiting for you to snap it but latter it will shock you with the secret the item inside. Reading this book alongside it was fantastic author who have write the book in such incredible way makes the content within easier to understand, entertaining approach but still convey the meaning fully. So , it is good for you because of not hesitating having this any more or you going to regret it. This book will give you a lot of benefits than the other book have got such as help improving your expertise and your critical thinking approach. So , still want to hold off having that book? If I were being you I will go to the publication store hurriedly.
