I am, therefore I think: A book of observations for those who wonder about their place in the Universe(s) Isabelle A. Chauffeton Saavedra

Was I born a blank slate or was I conscious prior to my birth? Is our Universe (are our universes) responsible for my awareness or do I create the universe(s) in which I live? Does our collective Consciousness expand in the same ways that our Universe(s) expands? The ultimate question is: “Are we responsible for our own choices or are we bound by one state of Consciousness from among an almost infinite number of other states of Consciousness? If you have ever wondered “why” or “how we got to be here” this book is for you. Using a combination of scientific concepts presented in layman’s terms, together with logical thinking and pattern comparisons, Isabelle Chauffeton Saavedra delivers a short and compelling set of cutting edge ideas regarding Consciousness. This book claims neither to be a scientific study nor a religious manual, but rather a collection of rational observations and specific inquiries into our place in the Universe(s) combined with just a dash of spirituality.
