Company Law in Context: Text and Materials David Kershaw

Company Law in Context is an ideal main text for company law and corporate governance courses at both undergraduate and postgraduate level. In this sophisticated book, David Kershaw combines commentary and explanation (55%) with the primary case and statutory materials (45%). The book places the study of company law in its economic, business, and social context in order to make more accessible and relevant the cases, statutes, and other forms of regulation that make up company law. One technique deployed by the book to contextualise company law is the use of a simple case study that tracks, through the different chapters of the book, the development and expansion of a business - from sole trader to listed company.
