Technology, e-learning and Distance Education (Routledge Studies in Distance Education) A.W. (Tony) Bates

Award-winning in its first edition, this book is an essential guide to the use of technology in flexible and distance learning, weighing up the pros and cons of different media. Fully updated, this second edition:

- examines criteria and guidelines for the design and delivery of effective teaching, using modern learning technologies
- focuses on the use of the Internet for distance and flexible education
- considers the design and use of emerging technologies such as web-based video-conferencing and speech recognition
- places emphasis on organisational and management issues and how these influence the effective use of technology
- gives attention to the integration of online teaching with campus-based face-to-face teaching.

With a focus on basic principles and general guidelines this guidance applies to existing and emerging technologies. It is essential reading not just for those specialising in flexible and distance learning and distance education, but anyone concerned with the integration of technology with teaching.
