## **Clinical Procedures in Veterinary Nursing, 2e** Victoria Aspinall BVSc MRCVS

This title is directed primarily towards health care professionals outside of the United States. The second edition of *Clinical Procedures in Veterinary Nursing* continues to provide a detailed 'skills analysis' of all the clinical procedures likely to be performed by a veterinary nurse in practice. Using its unique systematic approach, the book explains practical procedures used daily in veterinary practice, covering all aspects of a veterinary nurse's tasks, concentrating on small animal procedures. Clearly illustrated, with accompanying text provided in an accessible action-rationale format, each procedure includes an explanation of the theory behind the action, thus linking the classroom with clinical practice. With many additional and updated procedures this new edition concurs with current standards and introduces the most modern techniques to the veterinary nurse.

- Clear, step-by-step instructions are provided for each procedure
- A reference guide to best practice for both qualified and trainee veterinary nurses, veterinary technicians, diploma students and veterinary undergraduates
- Covers companion animals as well as exotic species
  
- Fully up-dated with additional procedures throughout
- Second colour increases ease of use and navigability
- New chapter "Preparing for the veterinary nursing exams"
- New practical layout ensures concise understanding of content by giving the rationale immediately after the action
- New photographs run alongside redrawn illustrations, making explanations even clearer
