Slawomir Koziel, Stanislav Ogurtsov

Antenna Design by Simulation-Driven Optimization (SpringerBriefs in Optimization) Slawomir Koziel, Stanislav Ogurtsov

This Brief reviews a number of techniques exploiting the surrogate-based optimization concept and variable-fidelity EM simulations for efficient optimization of antenna structures. The introduction of each method is illustrated with examples of antenna design. The authors demonstrate the ways in which practitioners can obtain an optimized antenna design at the computational cost corresponding to a few high-fidelity EM simulations of the antenna structure. There is also a discussion of the selection of antenna model fidelity and its influence on performance of the surrogate-based design process. This volume is suitable for electrical engineers in academia as well as industry, antenna designers and engineers dealing with computationally-expensive design problems.

From reader reviews:

Jose Goodell:

Why don't make it to be your habit? Right now, try to prepare your time to do the important action, like looking for your favorite e-book and reading a publication. Beside you can solve your long lasting problem; you can add your knowledge by the publication entitled Antenna Design by Simulation-Driven Optimization (SpringerBriefs in Optimization). Try to stumble through book Antenna Design by Simulation-Driven Optimization (SpringerBriefs in Optimization) as your close friend. It means that it can to get your friend when you experience alone and beside that course make you smarter than in the past. Yeah, it is very fortunated for you. The book makes you considerably more confidence because you can know every thing by the book. So , let's make new experience and knowledge with this book.

Carrie Porter:

People live in this new day of lifestyle always aim to and must have the extra time or they will get great deal of stress from both way of life and work. So , whenever we ask do people have extra time, we will say absolutely of course. People is human not just a robot. Then we inquire again, what kind of activity have you got when the spare time coming to anyone of course your answer can unlimited right. Then do you try this one, reading guides. It can be your alternative inside spending your spare time, often the book you have read will be Antenna Design by Simulation-Driven Optimization (SpringerBriefs in Optimization).

Leonard Bartow:

Playing with family within a park, coming to see the coastal world or hanging out with friends is thing that usually you may have done when you have spare time, in that case why you don't try factor that really opposite from that. One activity that make you not feeling tired but still relaxing, trilling like on roller coaster you have been ride on and with addition associated with. Even you love Antenna Design by Simulation-Driven Optimization (SpringerBriefs in Optimization), you can enjoy both. It is great combination right, you still want to miss it? What kind of hang-out type is it? Oh occur its mind hangout men. What? Still don't buy it, oh come on its called reading friends.

Trisha McClain:

It is possible to spend your free time to learn this book this publication. This Antenna Design by Simulation-Driven Optimization (SpringerBriefs in Optimization) is simple to deliver you can read it in the recreation area, in the beach, train and also soon. If you did not possess much space to bring the particular printed book, you can buy the e-book. It is make you quicker to read it. You can save the actual book in your smart phone. Therefore there are a lot of benefits that you will get when one buys this book.
