Understanding the term MAGNETIC FLUX is crucial because here is the most important subject to help you understand how the electricity is generated. Don't be reluctant to try to understand such term because it is not complicated at all. I just prepared for you a short lesson and you'll find a VIDEO DEMO. This video demo will make you understand easily the magnetic flux. Just follow this link and you'll have the chance to see a part of the lesson even before you buy this lesson: <http://scratch.mit.edu/projects/13162517/#fullscreen>

During my working life-time as electrical contractor and engineer I found that most of the electricians I meet will find it hard to explain how the electricity is generated. Well established companies do not pay too much attention to the electricians training. IBEW is doing something but not enough. The point is: you need to be a self-starter in order to achieve skills to protect yourself and others and be financially well. There is no blame in this; it's just my intention to help them a bit. I know how hard it is to support a family, to bring food and things to our loved ones since working hard. It remains no time to review and to make theoretical practice in order to understand everything we do.....unless we care about us! You have the option to achieve all modules from 1 to 20 or to choose the ones important for you in order to understand how the electricity is generated. I will encourage you to achieve the complete package and read them step by step as indicated below. Highlighted item is the one you just achieved
