Mathematical reform is the driving force behind the organization and development of this new precalculus text. The use of technology, primarily graphing utilities, is assumed throughout the text. The development of each topic proceeds from the concrete to the abstract and takes full advantage of technology, wherever appropriate. The first major objective of this book is to encourage students to investigate mathematical ideas and processes graphically and numerically, as well as algebraically. Proceeding in this way, students gain a broader, deeper, and more useful understanding of a concept or process. Even though concept development and technology are emphasized, manipulative skills are not ignored, and plenty of opportunities to practice basic skills are present. A brief look at the table of contents will reveal the importance of the function concept as a unifying theme. The second major objective of this book is the development of a library of elementary functions, including their important properties and uses. Having this library of elementary functions as a basic working tool in their mathematical tool boxes, students will be able to move into calculus with greater confidence and understanding. In addition, a concise review of basic algebraic concepts is included in Appendix A for easy reference, or systematic review. The third major objective of this book is to give the student substantial experience in solving and modeling real world problems. Enough applications are included to convince even the most skeptical student that mathematics is really useful. Most of the applications are simplified versions of actual real-world problems taken from professional journals and professional books. No specialized experience is required to solve any of the applications.

From reader reviews:

Frances Lockhart:

Reading a book tends to be new life style on this era globalization. With studying you can get a lot of information that may give you benefit in your life. Together with book everyone in this world could share their idea. Ebooks can also inspire a lot of people. A lot of author can inspire their very own reader with their story or their experience. Not only the storyplot that share in the publications. But also they write about the ability about something that you need case in point. How to get the good score toefl, or how to teach your children, there are many kinds of book that exist now. The authors on earth always try to improve their proficiency in writing, they also doing some investigation before they write to the book. One of them is this Mandatory Package: Precalculus: Graphs and Models w/ MathZone.

Odis Hillyard:

People live in this new time of lifestyle always aim to and must have the spare time or they will get large amount of stress from both daily life and work. So , once we ask do people have free time, we will say absolutely sure. People is human not really a huge robot. Then we inquire again, what kind of activity are you experiencing when the spare time coming to you of course your answer will unlimited right. Then ever try this one, reading publications. It can be your alternative within spending your spare time, the actual book you have read is actually Mandatory Package: Precalculus: Graphs and Models w/ MathZone.

Judy Bowen:

Is it an individual who having spare time then spend it whole day by means of watching television programs or just lying down on the bed? Do you need something new? This Mandatory Package: Precalculus: Graphs and Models w/ MathZone can be the reply, oh how comes? It's a book you know. You are so out of date, spending your free time by reading in this completely new era is common not a nerd activity. So what these publications have than the others?

Kirsten Ferguson:

A number of people said that they feel bored stiff when they reading a e-book. They are directly felt the idea when they get a half portions of the book. You can choose typically the book Mandatory Package: Precalculus: Graphs and Models w/ MathZone to make your own personal reading is interesting. Your skill of reading ability is developing when you similar to reading. Try to choose simple book to make you enjoy to study it and mingle the opinion about book and reading especially. It is to be first opinion for you to like to available a book and examine it. Beside that the reserve Mandatory Package: Precalculus: Graphs and Models w/ MathZone can to be your brand-new friend when you're experience alone and confuse in doing what must you're doing of their time.
