Atlas of Time-Temperature Diagrams for Nonferrous Alloys (Materials Data Series) George F. Vander Voort

The most comprehensive collection of time-temperature diagrams for nonferrous alloys ever collected. Between this volume and its companion, Atlas of Time Temperature Diagrams for Irons and Steels, you'll find the most comprehensive collection of time-temperature diagrams ever collected. Containing both commonly used curves and out-of-print and difficult-to-find data, these Atlases represent an outstanding worldwide effort, with contributions from experts in 14 countries. Time-temperature diagrams show how metals respond to heating and cooling, allowing you to predict the behavior and know beforehand the sequence of heating and cooling steps to develop the desired properties. These collections are a valuable resource for any materials engineer Both Collections Include: Easy-to-Read Diagrams: Isothermal transformation Continuous cooling transformation Time-temperature precipitation Time-temperature embrittlement Time-temperature ordering
