Financial & Managerial Accounting for Decision Makers is intended for use in an introductory accounting course that combines financial and managerial accounting concepts, at either the undergraduate or graduate level; one that balances the preparation of accounting information with its analysis. This book accommodates mini-courses lasting only a few days as well as extended courses lasting a full semester. This book is real-world oriented and focuses on the most salient aspects of accounting. It teaches students how to read, analyze, and interpret accounting data to make informed business decisions. To that end, it consistently incorporates real company data, both in the body of each chapter and throughout the assignment material.
