Regional Innovation Strategies

offers the first comprehensive analysis of the new wave of innovation-oriented regional policies. It draws conclusions from the European Regional Technology Plans and Regional Innovation Strategies, both in old industrialised areas and in regions where development is slow, and compares this with US and Canadian experiences.

Anticipating the enlargement of the EU, *Regional Innovation Strategies* also assesses the growing interest in the subject within policy, academic and practitioner circles in Central and Eastern European countries. This book aims to provide information on the new regional innovation policies and gives the first assessment of this promising pool of regional experiences.
