Text Analysis Pipelines: Towards Ad-hoc Large-Scale Text Mining (Lecture Notes in Computer Science) Henning Wachsmuth

This monograph proposes a comprehensive and fully automatic approach to designing text analysis pipelines for arbitrary information needs that are optimal in terms of run-time efficiency and that robustly mine relevant information from text of any kind. Based on state-of-the-art techniques from machine learning and other areas of artificial intelligence, novel pipeline construction and execution algorithms are developed and implemented in prototypical software. Formal analyses of the algorithms and extensive empirical experiments underline that the proposed approach represents an essential step towards the ad-hoc use of text mining in web search and big data analytics.

Both web search and big data analytics aim to fulfill peoples' needs for information in an adhoc manner. The information sought for is often hidden in large amounts of natural language text. Instead of simply returning links to potentially relevant texts, leading search and analytics engines have started to directly mine relevant information from the texts. To this end, they execute text analysis pipelines that may consist of several complex information-extraction and text-classification stages. Due to practical requirements of efficiency and robustness, however, the use of text mining has so far been limited to anticipated information needs that can be fulfilled with rather simple, manually constructed pipelines.

From reader reviews:

Geraldine Davis:

What do you think about book? It is just for students since they're still students or this for all people in the world, what best subject for that? Simply you can be answered for that question above. Every person has several personality and hobby per other. Don't to be forced someone or something that they don't desire do that. You must know how great along with important the book Text Analysis Pipelines: Towards Ad-hoc Large-Scale Text Mining (Lecture Notes in Computer Science). All type of book are you able to see on many methods. You can look for the internet sources or other social media.

David Shetler:

Playing with family in a park, coming to see the ocean world or hanging out with friends is thing that usually you have done when you have spare time, subsequently why you don't try matter that really opposite from that. Just one activity that make you not sense tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of information. Even you love Text Analysis Pipelines: Towards Ad-hoc Large-Scale Text Mining (Lecture Notes in Computer Science), you could enjoy both. It is good combination right, you still would like to miss it? What kind of hangout type is it? Oh seriously its mind hangout guys. What? Still don't have it, oh come on its referred to as reading friends.

Frances Temple:

Can you one of the book lovers? If yes, do you ever feeling doubt if you find yourself in the book store? Attempt to pick one book that you find out the inside because don't evaluate book by its include may doesn't work this is difficult job because you are afraid that the inside maybe not as fantastic as in the outside look likes. Maybe you answer could be Text Analysis Pipelines: Towards Ad-hoc Large-Scale Text Mining (Lecture Notes in Computer Science) why because the excellent cover that make you consider with regards to the content will not disappoint an individual. The inside or content is usually fantastic as the outside or cover. Your reading sixth sense will directly show you to pick up this book.

Robert Marshall:

In this era globalization it is important to someone to find information. The information will make someone to understand the condition of the world. The fitness of the world makes the information quicker to share. You can find a lot of references to get information example: internet, newspaper, book, and soon. You can view that now, a lot of publisher in which print many kinds of book. Typically the book that recommended for you is Text Analysis Pipelines: Towards Ad-hoc Large-Scale Text Mining (Lecture Notes in Computer Science) this e-book consist a lot of the information of the condition of this world now. This book was represented how can the world has grown up. The terminology styles that writer use to explain it is easy to understand. Typically the writer made some study when he makes this book. This is why this book ideal all of you.
