The Man Who Talks with the Flowers-The Intimate Life Story of Dr. George Washington Carver

Glenn Clark

2012 reprint of 1939 Edition. Full facsimile of the original edition, not reproduced with Optical Recognition Software. George Washington Carver (1864-1943) was an American scientist, botanist, educator and inventor. Much of Carver's fame is based on his research into and promotion of alternative crops to cotton, such as peanuts and sweet potatoes. He wanted poor farmers to grow alternative crops both as a source of their own food and as a source of other products to improve their quality of life. The most popular of his 44 practical bulletins for farmers contained 105 food recipes that used peanuts. He also promoted about 100 products made from peanuts that were useful for the house and farm, including cosmetics, dyes, paints, plastics, gasoline, and nitroglycerin. In addition to his work on agricultural extension education for purposes of advocacy of sustainable agriculture and appreciation of plants and nature, Carver's important accomplishments also included improvement of racial relations, mentoring children, poetry, painting, and religion. He served as an example of the importance of hard work, a positive attitude, and a good education. His humility, humanitarianism, good nature, frugality, and rejection of economic materialism also have been admired widely. This is the story of Glenn Clark's friendship with Carver.
