Feature Extraction & Image Processing for Computer Vision

Mark Nixon

Feature Extraction & Image Processing for Computer Vision Mark Nixon

This book is an essential guide to the implementation of image processing and computer vision techniques, with tutorial introductions and sample code in Matlab. Algorithms are presented and fully explained to enable complete understanding of the methods and techniques demonstrated. As one reviewer noted, "The main strength of the proposed book is the exemplar code of the algorithms."

Fully updated with the latest developments in feature extraction, including expanded tutorials and new techniques, this new edition contains extensive new material on Haar wavelets, Viola-Jones, bilateral filtering, SURF, PCA-SIFT, moving object detection and tracking, development of symmetry operators, LBP texture analysis, Adaboost, and a new appendix on color models. Coverage of distance measures, feature detectors, wavelets, level sets and texture tutorials has been extended.

- Named a 2012 Notable Computer Book for Computing Methodologies by *Computing Reviews*
- Essential reading for engineers and students working in this cutting-edge field
- Ideal module text and background reference for courses in image processing and computer vision
- The only currently available text to concentrate on feature extraction with working implementation and worked through derivation

From reader reviews:

Dwight Case:

What do you about book? It is not important along? Or just adding material when you need something to explain what you problem? How about your free time? Or are you busy person? If you don't have spare time to accomplish others business, it is make one feel bored faster. And you have spare time? What did you do? Every person has many questions above. They should answer that question due to the fact just their can do that will. It said that about reserve. Book is familiar in each person. Yes, it is right. Because start from on jardín de infancia until university need this specific Feature Extraction & Image Processing for Computer Vision to read.

Larry Swartz:

Do you considered one of people who can't read gratifying if the sentence chained from the straightway, hold on guys this kind of aren't like that. This Feature Extraction & Image Processing for Computer Vision book is readable through you who hate the perfect word style. You will find the facts here are arrange for enjoyable examining experience without leaving possibly decrease the knowledge that want to supply to you. The writer associated with Feature Extraction & Image Processing for Computer Vision content conveys the idea easily to understand by lots of people. The printed and e-book are not different in the content but it just different as it. So , do you nevertheless thinking Feature Extraction & Image Processing for Computer Vision is not loveable to be your top list reading book?

Kevin Blais:

Many people spending their time frame by playing outside together with friends, fun activity along with family or just watching TV the entire day. You can have new activity to shell out your whole day by reading through a book. Ugh, you think reading a book will surely hard because you have to take the book everywhere? It alright you can have the e-book, taking everywhere you want in your Touch screen phone. Like Feature Extraction & Image Processing for Computer Vision which is getting the e-book version. So , try out this book? Let's observe.

Lorraine Stark:

On this era which is the greater individual or who has ability to do something more are more treasured than other. Do you want to become one of it? It is just simple method to have that. What you have to do is just spending your time very little but quite enough to possess a look at some books. One of the books in the top listing in your reading list is actually Feature Extraction & Image Processing for Computer Vision. This book that is certainly qualified as The Hungry Inclines can get you closer in growing to be precious person. By looking upward and review this e-book you can get many advantages.
