Neoplastic Mimics in Soft Tissue and Bone Pathology

Vickie Y. Jo MD, Jason L. Hornick MD PhD

Neoplastic Mimics in Soft Tissue and Bone Pathology Vickie Y. Jo MD, Jason L. Hornick MD PhD

Neoplastic mimics or "pseudotumors" can simulate neoplasms on all levels of analysis--clinical, radiologic, and pathologic--and thus represent particular diagnostic pitfalls for the pathologist that can ultimately lead to therapeutic misdirection. This book, which contains more than 300 images, provides the pathologist with detailed morphologic descriptions and diagnostic guidance in recognizing these neoplastic mimics as they occur in the soft tissues and bones. In addition, descriptions and diagnostic guidance are provided for the range of lesions that are considered benign neoplasms but may mimic malignant tumors. Throughout the book comparisons of neoplastic mimics with true neoplasms (and benign neoplasms with sarcomas) are provided, at clinical, gross, and histologic levels. In the presentation of every entity, the points that contribute to differential diagnosis are emphasized. Every pathologist who sees soft tissue and bone cases will find this book an invaluable working tool to ensure accurate diagnosis.
