A Tour of C++ (C++ In-Depth Series)

Bjarne Stroustrup

A Tour of C++ (C++ In-Depth Series) Bjarne Stroustrup

The C++11 standard allows programmers to express ideas more clearly, simply, and directly, and to write faster, more efficient code. Bjarne Stroustrup, the designer and original implementer of C++, thoroughly covers the details of this language and its use in his definitive reference, *The C++ Programming Language, Fourth Edition*.

In *A Tour of C++*, Stroustrup excerpts the overview chapters from that complete reference, expanding and enhancing them to give an experienced programmer—in just a few hours—a clear idea of what constitutes modern C++. In this concise, self-contained guide, Stroustrup covers most major language features and the major standard-library components—not, of course, in great depth, but to a level that gives programmers a meaningful overview of the language, some key examples, and practical help in getting started.

Stroustrup presents the C++ features in the context of the programming styles they support, such as object-oriented and generic programming. His tour is remarkably comprehensive. Coverage begins with the basics, then ranges widely through more advanced topics, including many that are new in C++11, such as move semantics, uniform initialization, lambda expressions, improved containers, random numbers, and concurrency. The tour ends with a discussion of the design and evolution of C++ and the extensions added for C++11.

This guide does not aim to teach you how to program (see Stroustrup's *Programming: Principles and Practice Using C++* for that); nor will it be the only resource you'll need for C++ mastery (see Stroustrup's *The C++ Programming Language, Fourth Edition*, for that). If, however, you are a C or C++ programmer wanting greater familiarity with the current C++ language, or a programmer versed in another language wishing to gain an accurate picture of the nature and benefits of modern C++, you can't find a shorter or simpler introduction than this tour provides.

From reader reviews:

Saul Robinson:

The book A Tour of C++ (C++ In-Depth Series) make you feel enjoy for your spare time. You may use to make your capable considerably more increase. Book can being your best friend when you getting pressure or having big problem together with your subject. If you can make reading through a book A Tour of C++ (C++ In-Depth Series) for being your habit, you can get more advantages, like add your own capable, increase your knowledge about some or all subjects. It is possible to know everything if you like open up and read a e-book A Tour of C++ (C++ In-Depth Series). Kinds of book are a lot of. It means that, science guide or encyclopedia or other folks. So , how do you think about this e-book?

Kevin Roark:

A lot of people always spent their own free time to vacation as well as go to the outside with them family members or their friend. Were you aware? Many a lot of people spent that they free time just watching TV, or maybe playing video games all day long. In order to try to find a new activity that is look different you can read some sort of book. It is really fun in your case. If you enjoy the book which you read you can spent 24 hours a day to reading a reserve. The book A Tour of C++ (C++ In-Depth Series) it is very good to read. There are a lot of folks that recommended this book. These were enjoying reading this book. In the event you did not have enough space to bring this book you can buy the e-book. You can m0ore easily to read this book from your smart phone. The price is not to fund but this book possesses high quality.

Michael Blossom:

A Tour of C++ (C++ In-Depth Series) can be one of your beginner books that are good idea. Many of us recommend that straight away because this guide has good vocabulary that will increase your knowledge in words, easy to understand, bit entertaining however delivering the information. The author giving his/her effort that will put every word into pleasure arrangement in writing A Tour of C++ (C++ In-Depth Series) however doesn't forget the main place, giving the reader the hottest and also based confirm resource data that maybe you can be considered one of it. This great information can certainly drawn you into brand-new stage of crucial imagining.

Debra Davin:

Are you kind of active person, only have 10 or 15 minute in your day time to upgrading your mind proficiency or thinking skill possibly analytical thinking? Then you are receiving problem with the book than can satisfy your small amount of time to read it because all this time you only find publication that need more time to be examine. A Tour of C++ (C++ In-Depth Series) can be your answer because it can be read by anyone who have those short time problems.
